OSCE DAYS?

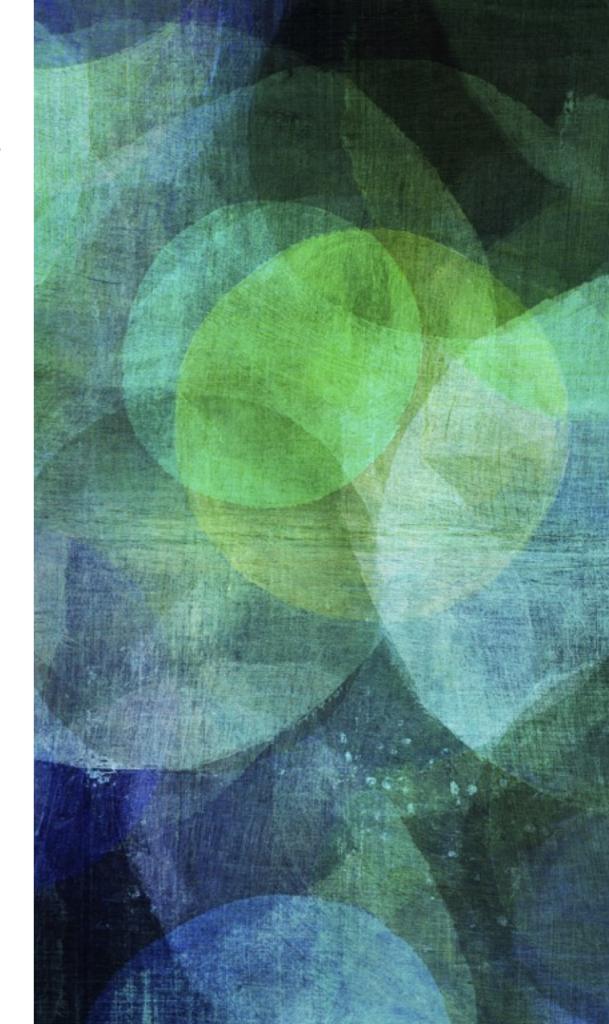

O P E L E days

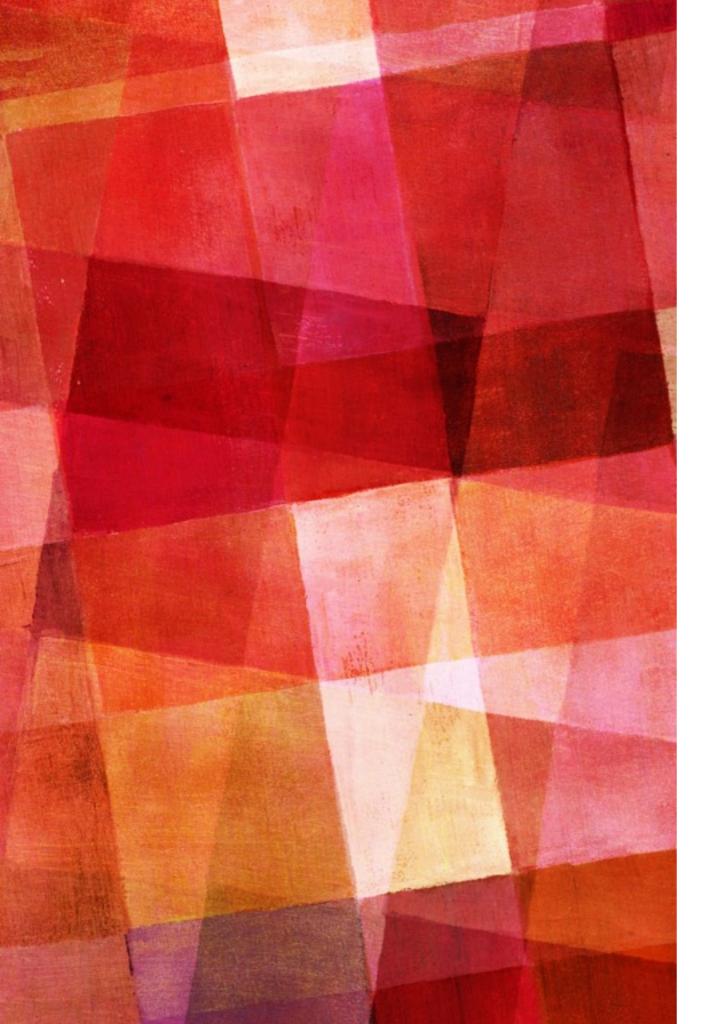

JUNE 9-13, 2016

https://www.youtube.com/watch?v=-NIzfNhEto4

CIRCULAR ECONOMY

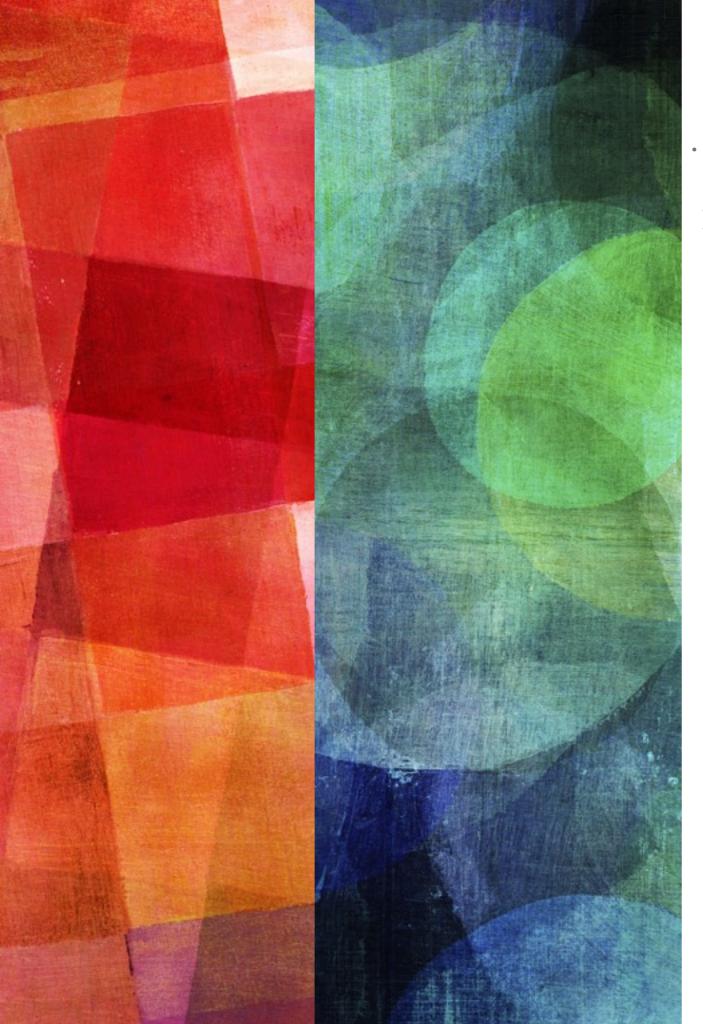

► is the concept of a truly sustainable economy that works without waste, saves resources and is in synergy with the biosphere. Rather than seeing emissions, byproducts, or damaged and unwanted goods as 'waste', in the circular economy they become raw material, nutrients for a **new** production cycle.

OPEN SOURCE

 is a successful collaboration method for developing software, hardware and design. It is based on transparent (and often distributed) development, and the open sharing of files and solutions.

OPEN SOURCE + CIRCULAR ECONOMY

a sustainable, waste free,
 circular economy needs
 transparency, open access to
 information and open source
 solutions

OSCE Emergent DAYS Eerlin

ZERO WASTE APPLIED TO P.E.A.C.E.S. ?

P.E.A.C.E.S.

- PERSONAL Who am I, where am I at in my life, where do I want to be and how do I get there? How do we find balance in our personal lives?
- ECOLOGIC Not just how to Rethink, Reduce, Reuse, Recycle, Responsibility, but how can we live in balance with the ecosystem that supports life on the planet?
- AESTHETIC How to understand and be in touch with the many ways it's possible to sense the world (seeing, touching, smelling, hearing, tasting, feeling)?
- CULTURAL How do we appreciate and learn from our differences but also focus on what we have in common?
- ECONOMIC How can we create more balanced systems of organizing ourselves to live humanely together?
- SOCIAL How can we learn to communicate with each other so that we can truly understand each other and work collaboratively to support each other
